BRUNSWICK  
COMMUNITY COLLEGE

# ARE YOU INTERESTED IN THE ART OF HEALING?

Massage therapists have the unique opportunity to combine professional artistry with the reward of making an immediate difference in the life of a client. The health benefits of this profession are recognized throughout the United States and across many cultures. Massage therapy has gained acceptance as a valid, holistic choice for those individuals seeking health and well-being.

The Massage Therapy program at Brunswick Community College (BCC) is designed to prepare students to successfully complete the North Carolina certification examination on their first attempt. The program will enable students to establish a solid professional foundation through traditional instruction and hands-on clinical experience. The program's modules include: anatomy and physiology, pathophysiology, active isolated stretching, reflexology, somatic psychology, body mechanics, hydrotherapy, joint mobility, kinesiology, laws and regulations, Asian massage theory, and an exhaustive series of massage techniques used by today's most respected therapists.

# RELAX
