

PROGRAM STUDENT LEARNING OUTCOMES

Landscape Design and Construction Certificate

Program SLO

Students will demonstrate knowledge of plant identification features of ornamental plants via the submission of the plant identification portfolio, achieving at least a 70% correct identification score on the faculty checklist.

Students will demonstrate the ability to operate trade-related equipment associated with maintaining the landscape by safely and successfully operating various pieces of equipment, as evaluated by faculty via observation of lab activities, achieving at least a 70% competency status for each piece of equipment.
